Small Dam Required?: No

OTHER COMMENTS*****

This right was originally filed for 13 acre feet, for a pond that inundated 3.0 acres and had a dam height of 18 feet. The original adjudication rough claim form showed the 13 acre feet with an average depth of 7.25 feet. The average depth was crossed off and replaced with 6.5 feet average depth. Someone then crossed off the 13 acre feet and replaced with 6.5 acre feet. We feel this was in error (confusing the average depth with capacity)and believe the capacity should have remained at 13 acre feet as per the application.
 Pond actual capacity was probably larger when it was built.
 (3 surface acres with an average depth of 6.5 feet = 19.5 acre feet.)
